POLLUTION REDUCTION PLAN

Notice is hereby given that the Borough of Quakertown is considering adoption of a Pollution Reduction Plan. The Plan specifies the activities proposed to reduce the total sediment and phosphorus levels discharging from the Borough of Quakertown storm sewer system in accordance with the requirements established by PADEP for the NPDES Storm Water Discharges from Small Municipal Separate Storm Sewer Systems program.

Various methods for the reduction of sediment and phosphorus levels were evaluated and have been outlined in the Plan which is available for public review at the Borough Municipal Building or on the municipal website (www.quakertown.org). The chosen alternative is to perform stream bank restoration on the section of the Licking Run Creek that runs parallel to Quakertown Memorial Park between N. Ninth and Fourth Streets. The restoration will effectively improve the water flow characteristics of the watercourse and reduce erosion of the stream bank, thereby reducing the sediment and phosphorus discharges from the Borough.

Notice is hereby given that the Pollution Reduction Plan is available for public review and comment for a period of thirty (30) days from the date of this posting at the Borough of Quakertown, 35 N. Third Street, Quakertown, PA 18951. The Borough will receive and consider comments on the Pollution Reduction Plan at a public meeting scheduled for Monday, August 28, 2017 at 7:30 p.m. at Borough Hall. All comments must be submitted in writing and addressed to Douglas C. Wilhelm, Borough of Quakertown, 35 N. Third Street, Quakertown, PA 18951 by Monday, August 21, 2017.
